February 1, 1984

Mr. Kenneth G. Mensing
Regional Manager
Illinois Environmental Protection Agency
117 West Main Street
Collinsville, IL 62234

Dear Mr. Mensing:

Enclosed you will find an enlarged drawing of sections N700-1200 and E-250-600 of drawing D-21880 which I gave you during our meeting of Friday, January 27, 1984. On this enlarged drawing we have indicated sample points, sewers, draining slopes and present asphalt or concrete covered areas. This drawing (D-24289) reflects how the area will look after construction is complete. As I mentioned in the meeting on Friday, the area around tanks 35-0122 through 35-0126 has been refilled with six to nine inches of new crushed limestone rock. Our plans would be to asphalt all non-covered areas between "G" Street and track No. 21 and from Second Street to Third Street. Where asphaltting is not possible we will add six inches of new crushed rock. If you have any questions please call me a 618-274-4000, extension 212.

We will await your response to our Friday proposal to complete the construction in this area and then cover it with asphalt. Also, as I mentioned on Friday, we would appreciate a timely response as we are beginning to feel the effects of this delay.

Sincerely,

Sam McWilliams
Plant Manager
